

Autism Society of America's Guide to Accessible Vaccine Clinics

Sensory Considerations

Turn lights low, reduce fluorescent lighting when possible.

Variety of seating options when available (chairs, cushions, bean bags, etc.)

Make a variety of sensory fidgets available at check in to use throughout the appointment (ideas below).

Noise canceling headphones available at check in

Play calming video/music

with low volume on available TVs/screens in shared spaces.

Reduce crowding to eliminate social and visual overwhelm.

Offer weighted

lap pads

Patience and a smile will go the extra mile.

- Sensory Fidget Tubes
- Squishy Stress Balls
- Infinity Cube Fidget
- Sensory Stress Ball and Water Bead Set
- Bubble Popper

Weighted Lap Pad

 Friendly Cuddle Weighted Lap Pad for Kids - Sensory Weighted Stuffed Animal

"My son was very comfortable getting his booster. The quiet rooms and friendly staff were a huge help. We were all very excited that he handled it so well." - VEI clinic participant

Appointment Preparation

Develop Social Narrative to help individuals and families prepare for the appointment.

Send paperwork ahead of time to reduce time spent waiting at check in.

Send a reminder email to participants with tips, resources, and paperwork

Prepare and send a visual schedule ahead of time. Participants can use this at the appointment to walk through the steps of the appointment.

Prepare a feedback survey to be taken during observation or sent out via email after the event.

Ask individualized questions during registration/sign up:

- How have past vaccine experiences gone?
- To help us prepare for a positive experience, please list any accommodations you may find helpful at this event below.
- Or please provide any additional information about how we can provide a successful vaccination experience.

Space Considerations Waiting room with sensory fidgets,

- activities, visual schedules.
- Private rooms for vaccine administration. • Plan for an extra vaccination room in case
- someone needs more time. • When possible, have separate observation
- Two separate observation spaces when possible - one with activities for children and one for older teens and adults.
- Allow movement, exploration, and play. • Clear signs showing where to go.
- Break space for volunteers, nurses, and others

and waiting rooms.

to reduce crowds, and noise in other spaces. Consider providing water, coffee, snacks, etc.

Injection Tools

Buzzy Bee: "Through a combination of vibration and ice pain-blocking methods, this FDA 510(k) cleared topical product is the most proven way to control pain associated with venipuncture and cosmetic injections. Our solutions use high-frequency, low amplitude vibration, which provides a more subtle sensation than percussive or other e-stimulation vibration therapies. Users should familiarize themselves with the vibration strength before the first application."

underside saturate the sensory nerves, distracting the patient from the pain signals caused by the needle poke."

Shotblockers: "The contact points on the

"The different tools used to distract my son and make him as comfortable and relaxed as possible. Also that nobody held him down."

How did this clinic promote vaccine access for your family?
